After much debate, #4Help has settled on the following is a list of hotline and helpline categories, subcategories and sub-subcategories. One could easily debate whether or not some of these line items belong on a list of hotline and/or helpline topics. We decided to err on the side of including too many, rather than too few. Main categories are in white font with purple background, subcategories are in bold maroon font with white backgrounds and sub-subcategories are in black font.
